

Suzan's story

My name is Suzan. I am 30 years old. I doing sexworker for 10 years. I working in the street crm Nugget and President street. My biggest problem during sex work is our client the don't want condom the break it and when the finish the took to the money the give to me. some gangster took to location and rape me without condom. it was 3 guys one of them was a police. For 2 days I try to run but I couldn't. After 2 days I go to a police station I open a case but the took the card I was got and police take me home. My boyfriend take me back to open the case again and the arrange a police woman. She open a case for me. She took me to the clinic for blood test and DNA test and the police was arrested for 16 years.

My biggest problem with the law and the police is that the take us as we are the animals. lot of abuse to a police; harassment. the don't want to take our case because we are a sex workers you deserve to be abused.

I think the best way to solve this problem is to, is to have sexworkers volunteers like us to teach the community about sexworkers, joining other organization ;Government meetings and the Police.

I believe that the law on sexworkers should stop their behavior and attitude and take us as human being.
